NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - COMPANY BACKGROUND

The Company's predecessor, Cardax Pharmaceuticals, Inc. ("Holdings"), was incorporated in the State of Delaware on March 23, 2006.

Cardax, Inc. (the "Company") (OTCQB:CDXI) is a development stage biopharmaceutical company primarily focused on the development of pharmaceuticals for chronic diseases driven by inflammation. The Company also has a commercial business unit that markets dietary supplements for inflammatory health. CDX-101, the Company's astaxanthin pharmaceutical candidate, is being developed for cardiovascular inflammation and dyslipidemia, with a target initial indication of severe hypertriglyceridemia. CDX-301, the Company's zeaxanthin pharmaceutical candidate, is being developed for macular degeneration, with a target initial indication of Stargardt disease. The Company's pharmaceutical candidates are currently in pre-clinical development, including the planning of IND enabling studies. ZanthoSyn® is a physician recommended astaxanthin dietary supplement for inflammatory health. The Company sells ZanthoSyn® primarily through wholesale and e-commerce channels. The safety and efficacy of the Company's products have not been directly evaluated in clinical trials or confirmed by the FDA.

Going concern matters

The accompanying condensed consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. As shown in the accompanying condensed consolidated financial statements, the Company incurred net losses of \$1,081,694 and \$2,217,114 for the three and six-months ended June 30, 2019, respectively, and incurred net losses of \$1,100,122 and \$2,147,985 for the three and six-months ended June 30, 2018, respectively. The Company has incurred losses since inception resulting in an accumulated deficit of \$64,160,432 as of June 30, 2019, and has had negative cash flows from operating activities since inception. The Company expects that its marketing program for ZanthoSyn® will continue to focus on outreach to physicians, healthcare professionals, retail personnel, and consumers, and anticipates further losses in the development of its consumer business. The Company also plans to advance the research and development of its pharmaceutical candidates and anticipates further losses in the development of its pharmaceutical business. As a result of these and other factors, management has determined there is substantial doubt about the Company's ability to continue as a going concern.

During the six-months ended June 30, 2019, the Company raised additional capital to carry out its business plan. As part of the Company's efforts, it raised an additional \$245,000 in equity from existing stockholders and issued \$1,625,000 in debt, including \$1,400,000 from a current stockholder that beneficially owns more than 5% of the Company's common stock and \$75,000 from a related party. In addition, the Company raised \$850,000 subsequent to June 30, 2019 from a current stockholder that beneficially owns more than 5% of the Company's common stock. On August 14, 2019, the Company filed a registration statement on Form S-1 for a proposed \$15 million public offering of common stock and warrants. The Company intends to use the proceeds from the proposed public offering primarily to fund pharmaceutical development and its operations. The Company's continued ability to raise additional capital through future equity and debt securities issuances is unknown. Obtaining additional financing, the successful development of the Company's contemplated plan of operations, and its transition, ultimately, to profitable operations are necessary for the Company to continue operations. The ability to successfully resolve these factors raises substantial doubt about the Company's ability to continue as a going concern. The condensed consolidated financial statements of the Company do not include any adjustments that may result from the outcome of these uncertainties.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unaudited interim financial information

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial information. In the opinion of the Company's management, the accompanying condensed consolidated financial statements reflect all adjustments, consisting of normal, recurring adjustments, considered necessary for a fair presentation of the results for the interim periods ended June 30, 2019 and 2018.

Although management believes that the disclosures in these unaudited condensed consolidated financial statements are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in financial statements that have been prepared in accordance U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC.

These unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and the related notes included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2018, filed with the SEC on March 28, 2019.

Revenue from contracts with customers

In May 2014, the Financial Accounting Standards Board ("FASB") issued a new standard related to revenue recognition. Under the standard, revenue is recognized when a customer obtains control of promised goods or services in an amount that reflects the consideration the entity expects to receive in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers.

The Company adopted this standard effective January 1, 2018, using the retrospective method. As there was no impact on contracts that were previously completed and no significant impact to contracts completed after adoption, there was no need to restate prior results from operations.

The Company recognizes revenues from its contracts with customers for its products through wholesale and e-commerce channels when goods and services have been identified, the payment terms agreed to, the contract has commercial substance, both parties have approved the contract, and it is probable that the Company will collect all substantial consideration.

The following table presents our revenues disaggregated by revenue source and geographical location. Sales and usage-based taxes are included as a component of revenues for the six-months ended:

		Jı	ine 30, 2019	June 30, 2018
Geographical area	Source	(Unaudited)	 (Unaudited)
United States	Nutraceuticals	\$	210,363	\$ 568,946
Hong Kong	Nutraceuticals	\$	-	\$ 16,413

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue from contracts with customers (continued)

Sales discounts, rebates, promotional amounts to vendors, and returns and allowances are recorded as a reduction to sales in the period in which sales are recorded. The Company records shipping charges and sales tax gross in revenues and cost of goods sold. Sales discounts and other adjustments are recorded at the time of sale.

Leases

In February 2016, the FASB issued ASU No. 2016-02, Leases. This ASU requires management to recognize lease assets and lease liabilities for all leases. ASU No. 2016-02 retains a distinction between finance leases and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous lease guidance. The result of retaining a distinction between finance leases and operating leases is that under the lessee accounting model, the effect of leases in the statement of comprehensive income and the statement of cash flows is largely unchanged from previous U.S. GAAP. The guidance in ASU No. 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years.

The Company applied the modified retrospective approach in adopting this standard. The modified retrospective approach includes a number of optional practical expedients that the Company elected to apply; primarily the identification and classification of leases that commenced before the effective date, initial direct costs for leases that commenced before the effective date, and the ability to use hindsight in evaluating lessee options to extend or terminate a lease or to purchase the underlying asset. As part of this adoption, the Company will, in effect, continue to account for leases that commence before the effective date in accordance with previous U.S. GAAP unless the lease is modified, except that lessees are required to recognize a right-of-use asset and a lease liability for all operating leases at each reporting date based on the present value of the remaining minimum rental payments that were tracked and disclosed under previous U.S. GAAP. This adoption of this standard on January 1, 2019, resulted in the Company recognizing a right-to-use asset and lease liability. The Company elected to not recognize any right-to-use assets or liabilities for leases that are twelve months or less. Lease costs are recognized straight-line over the term of the lease. The adoption of this standard did not impact retained earnings or cash flows of the Company.

Derivative financial instruments

The Company accounts for the fair value of the conversion feature in accordance with ASC 815-15, Derivatives and Hedging; Embedded Derivatives, which requires the Company to bifurcate and separately account for the conversion feature as an embedded derivative contained in the Company's convertible note. The Company is required to carry the embedded derivative on its balance sheet at fair value. The initial value of the embedded derivative is accounted for as a discount to the convertible note and a derivative liability. The liability is required to be remeasured at each reporting date and changes in fair value is recognized as a component in its results of operations. The Company valued the embedded derivatives on the condensed consolidated balance sheet at fair value using the Black-Scholes valuation model.

Discount

The Convertible Note was issued with a detachable warrant to purchase 500,000 shares of stock at \$0.20 per share. The valuation of the conversion feature and detachable warrants resulted in the recognition of a \$33,300 discount on this note at the date of issuance.

The Convertible Note is convertible into shares of common stock at \$0.12 per share for a maximum amount of 1,250,000 shares. This conversion feature is accounted for as an embedded derivative (see Note 8) and resulted in the recognition of a \$50,000 discount on this note at the date of issuance.

Total discounts of \$83,300 are amortized using the interest method, which resulted in amortization recorded as interest expense of \$9,459 for the three and six-months ended June 30, 2019.

Interest expense

The Company incurred interest charges of \$38,528 and \$58,501 during the three and six-months ended June 30, 2019, respectively, on these notes payable of which \$18,474 was accrued and payable as of June 30, 2019.

-	2020
-	2021
1,000,000	 2022
1,550,000	\$

NOTE 8 - DERIVATIVE FINANCIAL INSTRUMENT

The Company estimates the fair value of the conversion feature in its issued convertible note as derivative financial instrument at issuance and at each subsequent reporting date using the Black-Scholes valuation model. The initial value is used in the determination of a note discount with each subsequent change in fair value as a component of operations. The fair value assumptions related to options issued were as follows:

	As of June 30, 2019	As of Issuance Date of April 18, 2019
Dividend yield	0.0%	0.0%
Risk-free rate	1.92%	2.44%
Volatility	123%	102%
Expected term	1 year	1 year

Volatility was calculated based on the historical volatility of the Company. The risk-free interest rate used was based on the U.S. Treasury constant maturity rate in effect at the time of grant for the expected term of the stock options to be valued. The expected dividend yield was zero, because the Company does not anticipate paying a dividend within the relevant timeframe.

Non-statutory stock options and restricted stock may be granted to employees, directors, advisors, and consultants at a price per share, not less than 100% of the fair market value at date of grant. NOTE 11 - STOCK OPTION PLANS (continued)

The aggregate intrinsic value in the table above is before applicable income taxes and represents the excess amount over the exercise price option recipients would have received if all options had been exercised on June 30, 2019, based on a valuation of the Company's stock for that day.

A summary of the Company's non-vested options for the six-months ended June 30, 2019 and year ended December 31, 2018, are presented below:

Non-vested at January 1, 2018	2,000,000

Non-vested at June 30, 2019	2,650,005

The Company estimates the fair value of stock options granted on each grant date using the Black-Scholes option valuation model and recognizes an expense ratably over the requisite service period. The range of fair value assumptions related to options issued were as follows for the:

	Six-months ended	Year ended
	June 30, 2019	December 31, 2018
Dividend yield	0.0%	0.0%
Risk-free rate	2.38% - 3.04%	2.38% - 3.04%
Volatility	214% - 226%	214% - 226%
Expected term	3 - 7 years	3 - 7 years

Volatility was calculated based on the historical volatility of the Company. The risk-free interest rate used was based on the U.S. Treasury constant maturity rate in effect at the time of grant for the expected term of the stock options to be valued. The expected dividend yield was zero, because the Company does not anticipate paying a dividend within the relevant timeframe.

The Company records forfeitures as they occur and reverses compensation cost previously recognized, in the period the award is forfeited, for an award that is forfeited before completion of the requisite service period.

The Company estimates the fair value of warrants granted on each grant date using the Black-Scholes option valuation model. Volatility is calculated based on the historical volatility of the Company. The risk-free interest rate used is based on the U.S. Treasury constant maturity rate in effect at the time of grant for the expected term of the warrants to be valued. The expected dividend yield is zero, because the Company does not anticipate paying a dividend within the relevant timeframe.

NOTE 12 - WARRANTS (continued)

Warrant exchange offering

In June 2018, the Company commenced an offering to exchange outstanding warrants for shares of common stock under a Form S-4 Registration Statement. These shares of common stock were issued to warrant holders in exchange for (i) their outstanding warrants to purchase shares of common stock at \$0.625 per share, and (ii) cash payment of \$0.15 per share. This offering closed on July 27, 2018, and resulted in an exchange of 9.6 million warrants and \$1,440,043 in gross proceeds for 9,600,286 shares of common stock. Stock issuance costs associated with this capital raise totaled \$196,006, resulting in a net total of \$1,244,037 raised in this offering. As part of this offering, warrants to purchase 315,010 shares of common stock at \$0.21 per share were issued to investment bankers for their services.

Warrant expiration

During the six-months ended June 30, 2019, warrants to purchase an aggregate of 18,405,496 were canceled. During the year ended December 31, 2018, warrants to purchase an aggregate of 101,984 expired.

NOTE 13 - INCOME TAXES

The Company accounts for income taxes using the asset and liability method. Under this method, deferred income tax assets and liabilities are determined based upon the difference between the financial statement carrying amounts and the tax basis of assets and liabilities and are measured using the enacted tax rate expected to apply to taxable income in the years in which the differences are expected to be reversed.

The effective tax rate for the three and three-months ended June 30, 2019 and 2018, differs from the statutory rate of 21% as a result of state taxes (net of Federal benefit), permanent differences, and a reserve against deferred tax assets.

The Company's valuation allowance was primarily related to the operating losses. The valuation allowance is determined in accordance with the provisions of ASC No. 740, *Income Taxes*, which requires an assessment of both negative and positive evidence when measuring the need for a valuation allowance. Based on the available objective evidence and the Company's history of losses, management provides no assurance that the net deferred tax assets will be realized. As of June 30, 2019, and December 31, 2018, the Company has applied a valuation allowance against its deferred tax assets net of the expected income from the reversal of the deferred tax liabilities.

Recent tax legislation

On March 22, 2018, the Tax Cuts and Jobs Act ("TCJA") was enacted into law, which significantly changes existing U.S. tax law and includes numerous provisions that affect our business, such as reducing the U.S. federal statutory tax rate from 35% to 21% effective January 1, 2018.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

NOTE 13 – INCOME TAXES (continued)

Uncertain tax positions

The Company is subject to taxation in the United States and two state jurisdictions. The preparation of tax returns requires management to interpret the applicable tax laws and regulations in effect in such jurisdictions, which could affect the amount of tax paid by the Company. Management, in consultation with its tax advisors, files its tax returns based on interpretations that are believed to be reasonable under the circumstances. The income tax returns, however, are subject to routine reviews by the various taxing authorities. As part of these reviews, a taxing authority may disagree with respect to the tax positions taken by management ("uncertain tax positions") and therefore may require the Company to pay additional taxes.

Management evaluates the requirement for additional tax accruals, including interest and penalties, which the Company could incur as a result of the ultimate resolution of its uncertain tax positions. Management reviews and updates the accrual for uncertain tax positions as more definitive information becomes available from taxing authorities, completion of tax audits, expiration of statute of limitations, or upon occurrence of other events.

As of June 30, 2019 and December 31, 2018, there was no liability for income tax associated with unrecognized tax benefits. The Company recognizes accrued interest related to unrecognized tax benefits as well as any related penalties in interest income or expense in its condensed consolidated statements of operations, which is consistent with the recognition of these items in prior reporting periods.

The federal and state income tax returns of the Company are subject to examination by the IRS and state taxing authorities, generally for three years after they were filed.

Corporate Overview and History

We are a development stage biopharmaceutical company primarily focused on the development of pharmaceuticals for chronic diseases driven by inflammation. We also have a commercial business unit that markets dietary supplements for inflammatory health. CDX-101, our astaxanthin pharmaceutical candidate, is being developed for cardiovascular inflammation and dyslipidemia, with a target initial indication of severe hypertriglyceridemia. CDX-301, our zeaxanthin pharmaceutical candidate, is being developed for macular degeneration, with a target initial indication of Stargardt disease. Our pharmaceutical candidates are currently in pre-clinical development, including the planning of IND enabling studies. ZanthoSyn® is a physician recommended astaxanthin dietary supplement for inflammatory health. We sell ZanthoSyn® primarily through wholesale and e-commerce channels. The safety and efficacy of our products have not been directly evaluated in clinical trials or confirmed by the FDA.

At present we are not able to estimate if or when we will be able to generate sustained revenues. Our financial statements have been prepared assuming that we will continue as a going concern; however, given our recurring losses from operations, our independent registered public accounting firm has determined there is substantial doubt about our ability to continue as a going concern.

Operating Summary for the Three-Months Ended June 30, 2019 and 2018

Our revenues presently derive from the sale of ZanthoSyn® primarily through wholesale and, to a lesser extent, e-commerce channels. We launched our e-commerce channel in 2016 and began selling to GNC stores in 2017. ZanthoSyn® is currently available at over three thousand GNC corporate stores in the United States. As a result, revenues were \$45,391 and \$272,049 for the three-months ended June 30, 2019 and 2018, respectively. The decrease in revenues for the three-months ended June 30, 2019 was primarily attributed to a combination of (i) GNC selling through existing ZanthoSyn® inventory we sold to GNC during the prior year, which impacted the timing and amounts of replenishment orders during the current period, (ii) increased promotional activities at GNC stores, which increased the sales discounts passed through to us during the current period, and (iii) GNC inventory adjustments to focus on ZanthoSyn 60 count and 90 count bottles, which are the top performing ZanthoSyn variants at GNC, resulting in a one-time return of remaining ZanthoSyn 30 count bottles from GNC inventory to us. Costs of goods sold were \$29,481 and \$145,669 for the three-months ended June 30, 2019 and 2018, respectively, and included costs of the product, shipping and handling, sales taxes, merchant fees, and other costs incurred on the sale of goods. Gross profits were \$15,910 and \$126,380 for the three-months ended June 30, 2019 and 2018, respectively, which represented gross profit margins of approximately 35% and 46%, respectively. The decrease in gross profit margin for the three-months ended June 30, 2019 was primarily attributed to increased promotional activities at GNC stores, which increased the sales discounts passed through to us during the current period.

Operating expenses were \$1,065,322 and \$1,226,106 for the three-months ended June 30, 2019 and 2018, respectively. Operating expenses primarily consisted of services provided to the Company, including payroll, consultation, and contract services, for research and development, including our clinical trial and pharmaceutical development programs, sales and marketing, and administration. These expenses were paid in accordance with agreements entered with each employee or service provider. Included in operating expenses were \$178,687 and \$133,062 in stock-based compensation for the three-months ended June 30, 2019 and 2018, respectively. The decrease in operating expenses for the period from the same period in the prior year was primarily related to a sales and marketing conference and related expenses that occurred in 2018 but not in 2019.

Other expenses, net, were \$32,282 and \$396 for the three-months ended June 30, 2019 and 2018, respectively. For the three-months ended June 30, 2019, other expenses, net, consisted of the change in the fair value of a derivative liability and interest expense of \$17,385 and \$(49,667), respectively. For the three-months ended June 30, 2018, other expenses, net, consisted of interest income and interest expense of \$815 and \$(1,211), respectively.

Operating Summary for the Six-Months Ended June 30, 2019 and 2018

Our revenues were \$210,363 and \$585,359 for the six-months ended June 30, 2019 and 2018, respectively. The decrease in revenues for the six-months ended June 30, 2019 was primarily attributed to a combination of (i) GNC selling through existing ZanthoSyn® inventory we sold to GNC during the prior year, which impacted the timing and amounts of replenishment orders during the current period, (ii) increased promotional activities at GNC stores, which increased the sales discounts passed through to us during the current period, and (iii) GNC inventory adjustments to focus on ZanthoSyn 60 count and 90 count bottles, which are the top performing ZanthoSyn variants at GNC, resulting in a one-time return of remaining ZanthoSyn 30 count bottles from GNC inventory to us. Costs of goods sold were \$133,661 and \$281,201 for the six-months ended June 30, 2019 and 2018, respectively, and included costs of the product, shipping and handling, sales taxes, merchant fees, and other costs incurred on the sale of goods. Gross profits were \$76,702 and \$304,158 for the six-months ended June 30, 2019 and 2018, respectively, which represented gross profit margins of approximately 36% and 52%, respectively. The decrease in gross profit margin for the six-months ended June 30, 2019 was primarily attributed to increased promotional activities at GNC stores, which increased the sales discounts passed through to us during the current period.

Operating expenses were \$2,240,377 and \$2,452,541 for the six-months ended June 30, 2019 and 2018, respectively. Operating expenses primarily consisted of services provided to the Company, including payroll, consultation, and contract services, for research and development, including our clinical trial and pharmaceutical development programs, sales and marketing, and administration. These expenses were paid in accordance with agreements entered with each employee or service provider. Included in operating expenses were \$359,062 and \$262,687 in stock-based compensation for the six-months ended June 30, 2019 and 2018, respectively. The decrease in operating expenses for the period from the same period in the prior year was primarily related to a sales and marketing conference and related expenses that occurred in 2018 but not in 2019.

Other income (expenses), net, were \$(53,439) and \$398 for the six-months ended June 30, 2019 and 2018, respectively. For the six-months ended June 30, 2019, other expenses, net, consisted of the change in the fair value of a derivative liability, interest expense, and interest income of \$17,385, \$(70,826), and \$2, respectively. For the six-months ended June 30, 2018, other expenses, net, consisted of interest and other income and interest expense of \$1,934, \$556, and \$(2,092), respectively.

Liquidity and Capital Resources

Since our inception, we have sustained operating losses and have used cash raised by issuing securities in our operations. During the six-months ended June 30, 2019 and 2018, we used cash in operating activities in the amount of \$2,067,948 and \$1,889,326, respectively, and incurred net losses of \$2,217,114 and \$2,147,985, respectively.

We require additional financing in order to continue to fund our operations and to pay existing and future liabilities and other obligations.

On August 14, 2019, we filed a registration statement on Form S-1 for a proposed \$15 million public offering of common stock and warrants. We intend to use the proceeds from the proposed public offering primarily to fund pharmaceutical development and our operations. After giving effect to the net proceeds that we will receive from the proposed public offering, if closed, we expect to have sufficient cash resources to fund the budgeted expenditures for our expected operations for at least one year. We cannot give any assurance that the proposed public offering will be consummated.

We also may continue to obtain additional financing from investors through the private placement of our common stock and warrants to purchase our common stock or through the issuance of debt or convertible debt securities and plan to do so prior to the closing of the proposed public offering. There can be no assurance that a financing transaction will be available to us on terms and conditions that we determined are acceptable.

We cannot give any assurance that we will in the future be able to achieve a level of profitability from the sale of existing or future products or otherwise to sustain our operations. These conditions raise substantial doubt about our ability to continue as a going concern. The accompanying financial statements do not include any adjustments to reflect the possible future effects on recoverability and reclassification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Any inability to obtain additional financing on acceptable terms will materially and adversely affect us, including requiring us to significantly curtail or cease business operations altogether.

Our working capital and capital requirements at any given time depend upon numerous factors, including, but not limited to:

- revenues from the sale of any products or licenses;
- costs of production, marketing and sales capabilities, or other operating expenses; and
- costs of research, development, and commercialization of our products and technologies.

We have undertaken certain actions regarding the advancement of our pharmaceutical development program, the conduct of a dietary supplement clinical trial, and the continued sales and marketing of our commercial dietary supplement. We plan to fund such activities, including compensation to service providers, with a combination of cash and equity payments. The amount of payments in cash and equity will be determined by us from time to time.

We expect that the proposed public offering should provide sufficient capital to satisfy our ongoing obligations, although no assurance can be made that such public offering will be consummated on acceptable terms, if at all. To the extent our cash and cash equivalents, cash flow from operating activities, and proceeds from the revolving inventory financing facility or the proposed public offering are insufficient to fund our future activities, including the development of our pharmaceutical candidates, we will need to raise additional funds through private or public equity or debt financings or bank credit arrangements. We also may need to raise additional funds in the event we determine to effect one or more acquisitions of, or investments in, businesses, services, or technologies. If additional funding is required, we may not be able to effect equity or debt financing or obtain bank credit arrangements on terms acceptable to us or at all.

The following is a summary of our cash flows provided by (used in) operating, investing, and provided by financing activities during the periods indicated:
